

## ACquire Impact on IT Area

3/6/2001

Area	Impact
Mainframe Sysop(s) Network Administrator Network Installation Personnel Alltel Representative	<b>Hardware &amp; Software Installation</b> <ul style="list-style-type: none"> <li>• Install one NT server computer with BarCard (serves as mainframe virtual printer, ACquire program and data storage). Approximately 2 hours over a day.</li> <li>• Sysop sets up ACquire printer on mainframe. On other mainframes, "shares" the ACquire printer. Establishes access to ACquire printer in user profiles. Runs system reports as needed to test the printer and software. Approximately 2 hours over a day.</li> <li>• Network Administrator sets up the server for network operation. Adds designated users to ACquire Administrator and ACquire User profiles. Adds server to routine system backup configuration. Approximately 2 hours over a day.</li> <li>• Alltel Representative directs the hardware and software installation on the mainframe and server. Installs and configures the ACquire software on the server. Tests the system with files generated by the Sysop.</li> </ul>
Designated ACquire Developers	<ul style="list-style-type: none"> <li>• Receive ACquire Developer training from the Alltel representative. Approximately 2 days, possibly three.</li> </ul>

Area	Impact
Maintenance after Installation and Training	<ul style="list-style-type: none"><li>• Mainframe Sysop may add reports or queries to the automatically-scheduled runs (“Robot”) at the developers’ requests. Approximately 1 hour per month.</li><li>• Network Administrator maintains space allocation on the server for data storage (infrequent). Adds additional users as necessary to the ACquire Administrator and ACquire User profiles. Approximately 1 hour per month.</li><li>• ACquire Developers continue report development in response to the company’s needs.</li></ul>
